Pre-retirement Index Portfolios: Regulation 28 compliant

Tel. 021 412 1010 invest@10X.co.za www.10x.co.za

ABOUT 10X

Our goal is to give investors more money at and in retirement. We achieve this by providing one optimal investment solution, and no competing choices.

Three investment principles underlie 10X's life-stage portfolios:

- 1. Time drives investment risk
- 2. Index funds
- 3. Low fees

Time drives investment risk

10X invests each client's money according to their retirement date. Those more than 5 years from retirement are invested in the 10X High Equity Portfolio, to maximise

Those within 5 years of retirement are invested in portfolios with gradually declining equity exposure to preserve their capital. Investors planning for a living annuity at retirement can opt-out of this default path.

10X LIFE STAGE PORTFOLIOS¹

02 Index funds

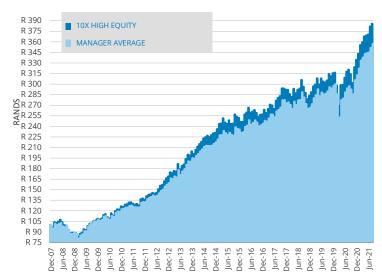

10X uses index funds as 3 out of 4 have historically outperformed active funds after costs.

An index fund owns the same basket of investments as the index and therefore earns the index return at a low cost. Active funds do not own the same basket of investments as the index and therefore returns differ from the index return, and costs are higher.

The 10X High Equity Portfolio has consistently outperformed the average return of large fund managers (BEFORE FEES) since inception (1 January 2008). 10X's total fees are generally half the industry average** and so 10X saves most clients at least 1% pa (of the investment balance) in fees. We thus also show the average return of large fund managers reduced by a 1% higher fee to show the effect of the fee differential. Higher fees will always reduce the investment outcome regardless of market performance, however past performance is used here for illustrative purposes.

* Profile Data, 10X, General Equity unit trusts, 5 yrs to Dec 2019, index fund assumed to be ALSI less 0.4% pa fee. ** National Treasury, Charges in South African retirement funds , July 2013.

10X charges low total fees to ensure investors save more of their money, and keep more of the investment

A lump sum of R100,000 invested over a working life (40 years) earning 6.5% pa plus inflation will grow to R1.24 million in today's money. However, this is before fees. Paying a fee of 0.5% pa (as a % of investment value), your lump sum will only grow to R1.02 million. In fact, for every 1% in fees you save per annum, you will have almost 50% more money after 40 years.

AFTER INFLATION VALUE OF R100,000 INVESTED FOR 40 YEARS EARNING 6.5% PA PLUS INFLATION²

SOURCE: 10X Investments. This graph shows the hypothetical 6.5% pa return above inflation.
